Course Curriculum

Phase 1: Foundations of Editing & Premiere Pro Modules 01–02

Editing grammar, media management and Premiere Pro timeline mastery.

01. Video Editing Fundamentals 4 sessions

- Frame rates (24p, 30p, 60p, 120p) & Resolutions (1080p, 4K, 8K)
- Aspect ratios (16:9, 9:16 vertical, 1:1 square, 2.39:1 scope)
- Types of cuts: J-Cut, L-Cut, Match Cut, Jump Cut, Cross Cut
- Continuity editing vs Montage theory & pacing rhythm
- Proxy workflows for smooth 4K/8K footage playback
- Ingest settings, scratch disks, and project bin structure

02. Adobe Premiere Pro Essentials 8 sessions

- Three-point and four-point editing methods
- Ripple edit, Rolling edit, Slip, and Slide tools
- Multicam editing setup with sync markers & audio waveform
- Keyframing motion properties, scale, rotation & anchor points
- Time remapping & Speed ramps for dynamic transitions
- Optical Flow, Frame Sampling, and Frame Blending

Phase 2: Motion Graphics & Visual Effects Modules 03–04

Motion graphics in After Effects, VFX compositing, tracking and rotoscoping.

03. Adobe After Effects Motion Graphics 10 sessions

- Kinetic typography, animated lower thirds, and titles
- Shape layers, graph editor curves for smooth interpolation
- Dynamic Link setup between Premiere Pro and After Effects
- Logo reveals and commercial title stingers

04. Visual Effects & Compositing 8 sessions

- Chroma Keying: Green screen keylight, spill suppressor, matte cleanup
- Mocha AE motion tracking & camera tracking for object replacement
- Rotoscoping with Roto Brush 2 for subject isolation
- Screen replacement for mobile/laptop screens

Phase 3: Color Correction & Grading in DaVinci Resolve Modules 05–06

Technical colour balancing with scopes and stylised cinema looks.

05. Color Correction & Scopes 6 sessions

- Reading Waveform, Vector scope, Histogram, and Parade
- Primary wheels: Lift, Gamma, Gain, Offset balancing
- White balance correction & exposure normalization
- Rec.709 color space conversions from LOG footage

06. Creative Color Grading 8 sessions

- Secondary color grading: Qualifier keys & power windows
- Skin tone isolation and color perfection
- Creating Teal & Orange film looks, film grain emulation
- Working with 3D LUTs & node tree management

Phase 4: Audio Editing, Sound Design & Mixing Modules 07–08

Spectral audio repair in Audition and iZotope RX, sound design and loudness-compliant final mixes.

07. Audio Restoration (Adobe Audition) 6 sessions

- Spectral frequency display for noise surgical removal
- Removing background hums, clicks, mouth pops, and wind noise
- iZotope RX AI De-noise, De-reverb, and De-essers
- Dialog isolation from noisy live environments

08. Sound Design & Final Mix 8 sessions

- Foley sound effects layering & impact risers for trailers
- Audio ducking and background music balancing
- EQ, Multiband Compression, and Reverb buses
- Loudness normalization: EBU R128 & YouTube (-14 LUFS) standards

Projects & Hands-On Labs

Vlog & Promo Assembly
Cut a 1-minute YouTube vlog with basic cuts, background music balance, text titles, and clean export.

Commercial TV Ad Cut & Re-cut
Edit a 30-second high-energy brand commercial with speed ramps, sound triggers, and custom graphics.

DaVinci Resolve Cinematic Grade
Node-based color grading of flat Log footage, matching multi-camera skin tones and applying film emulation.

60-90 Sec Industry Showreel
Assemble your signature studio-ready editing showreel showcasing your best visual, motion, and sound work.
